

TOUCH-SCREEN KIOSKS

THE EASY WAY TO CAPTURE PATIENT FEEDBACK

Data capture is a vital element for the NHS, whether for patient opinion of services, patient feedback on particular issues or to improve patient awareness.

Touch-screen kiosks are increasingly recognised as an effective interface with which to engage with patients. Running a survey on a touch-screen kiosk is an extremely effective way to delve into the detail of the day to day experience of your healthcare organisation.

Mindful of this, Speedwell has developed an incredibly simple way for you to survey and capture patient opinions with total independence.

Underpinning the whole procedure is survey software, already used in the NHS, called KeyPoint and Speedwell's new touch-screen kiosks.

Equip your organisation with KeyPoint and touch-screen kiosks and you'll have the fastest method of capturing patient opinions.

Why wait?

KEY FEATURES

Accessible for everybody

Friendly design, with adjustable height attracting people of all ages

Easy to use

Easy input options are complemented by a dynamic and flexible design, making the kiosks totally equipped for all your surveys needs.

Super bright touch-screen

Kiosks get high marks for their large, bright displays and touch-screens.

Compatible survey software

KeyPoint software allows you to utilise your touch-screen kiosks to collect feedback efficiently and conveniently.

Innovative design

Unique, accessible touch-screen kiosks that come in a wide range of colours to appeal to children and adults alike.

Powerful Processor

High specification processor for even more mobile processing power.

Installation and guarantee

Complete installation and 3 year guarantee.

“ The accessible nature of the kiosks, (in terms of colour, height, adjustment, and design) makes them attractive to children and young people as well as adults. ”

Coventry City Council
